

# NDP 2021: COVID-19 Safety Measures

NDP organisers have implemented a multi-layered COVID-19 prevention strategy for NDP participants.

## VACCINATIONS

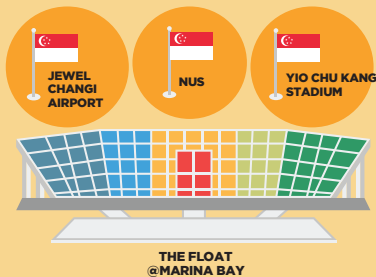

- All participants eligible for vaccination to be vaccinated
- Both doses will be administered before rehearsals commence at the Float and satellite sites
- Participants involved in spectator management and external security would receive both doses at least two weeks prior to their deployment date

## TESTING

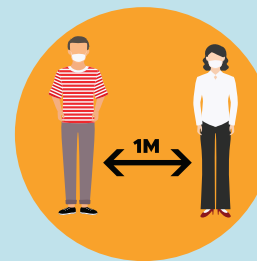

- Weekly rostered routine testing (RRT) for participants
- NDP will pilot self-administered antigen rapid tests for RRT purposes, in the form of fast and easy testing with Parade & Ceremony participants and working parties

## REDUCED EXPOSURE

- Number of participants at The Float@Marina Bay reduced by 70 per cent. To reduce crowding, participants have been rehearsing at separate locations
- Reduced number of shows and rehearsals
- Rehearsals held virtually during Phase 2 (Heightened Alert)

## SAFE MANAGEMENT MEASURES (SMM)

- Self-monitoring of health by participants
- Strict separation between the participants in parade and show, and between individual show acts
- Minimisation of prolonged contact between participants in performance areas
- Participants held in smaller groups of up to 50 during breaks, and subdivided into smaller groups wherever possible
- Checks on adherence to SMM at every level (e.g. participants, trainers, organisers)
